Professional Experience

Mango Mass Media Pvt Ltd **Nov 2024 – Present**

Junior Software Developer *Hyderabad, India*

Digital Asset Management Platform – *React.js, Redux Toolkit, Node.js, Express, MongoDB, AWS*

- Designed and built the **DAM home dashboard for a reporting microservice**, shaping component structure, data flows, and REST API integration to deliver a responsive, data-driven reporting experience.
- Built a reusable, **schema-driven React form system across 10+ modules**, centralizing state in Redux Toolkit; applied **test-driven development (TDD)** with Jest to shared validation and UI logic.
- Owned search and filtering **end to end across React, REST APIs, and MongoDB** for **1M+ assets**; added pagination and compound indexes, lowering p95 search latency **61% (2.8s to 1.1s)**.
- Developed **responsive React / Material UI screens** for complex CMS workflows; optimized DOM interactions, asynchronous data handling, and browser rendering across device sizes.
- Designed and tuned **Node.js / Express APIs across 35+ data models**, supporting **10K+ requests/day**; reduced p95 latency **40% (420ms to 250ms)** with indexing, aggregation tuning, and caching.
- Replaced timeout-prone XLSX/CSV exports with a **streamed, asynchronous queue pipeline** backed by MongoDB and AWS S3, saving **33+ engineering hours/week**.
- Gathered feedback in **client meetings** and from end users and senior management, balancing competing needs into deliverable product changes; reviewed code and shipped releases via **GitLab CI/CD** on Linux.
- Supported production systems with **structured logs, request tracing, and performance dashboards**; applied frontend and backend TDD practices to improve maintainability and reliability.

AI Document Extraction Service – *Python, FastAPI, Vertex AI, Pydantic*

- Worked with legal and product teams to build a **Python / FastAPI microservice** that converted agreement PDFs to validated JSON, achieving **90%+ extraction accuracy across 75+ fields** on **3K+ agreements**.
- Improved async processing throughput **5x (50–75 to 350–400 documents/day)** with batching, adaptive rate limiting, and validation around external AI API calls.

Mango Mass Media Pvt Ltd **Oct 2024 – Nov 2024**

Software Developer Intern *Hyderabad, India*

- Built resilient **Python ETL pipelines processing 100K+ records/day**, with schema checks, batched I/O, and retries; reduced reporting turnaround from **4 hours to 15 minutes**.
- Created **SQL reporting queries and Apache Superset dashboards** for **50+ stakeholders**, tracking viewership, revenue, and operational metrics.

Technical Skills

Languages & Web: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Redux Toolkit, Material UI, Responsive Design, DOM, Browser Performance, React Router

Backend: Node.js, Express.js, FastAPI, REST APIs, Microservices, Async JavaScript, Queues, JWT Auth

Data & Cloud: MongoDB, MySQL, Indexing, Aggregation Pipelines, Caching, AWS (EC2, S3, SES), ETL

Testing & Tooling: TDD, Jest, Webpack, Babel, Yarn, NPM, Git, GitLab CI/CD, Linux, PM2, Docker, Postman

AI: Vertex AI, OCR, RAG, Pydantic

Education

GITAM University **Jun 2019 – May 2023**

Bachelor of Technology in Computer Science *CGPA: 8.25/10*
